

Tracking Parkinson's (PRoBaND) *L-dopa challenge* *Study timelines*

Donald Grosset
Consultant Neurologist and Honorary Professor

May 2019

Clinicians

28/03/2019 | **Advice on Visit 10 L-dopa Challenge**

Patients should complete an L-dopa challenge at V10 if they are currently taking L-dopa and they did **not** do a challenge at V5.

If you have not done a challenge test (for any reason*), record a 'standard' UPDRS 3 score, and put it in this **Baseline** section

*Reasons include:

- Already did challenge test at V5
- Not yet on L-dopa
- Patient forgot instructions! →
- Researcher forgot! →

Clinicians

28/03/2019 | **Advice on Visit 10 L-dopa Challenge**

Patients should complete an L-dopa challenge at V10 if they are currently taking L-dopa and they did **not** do a challenge at V5.

If a patient misses the challenge at Visit 10 because they forgot to miss their medication or they were not consented in time, please **schedule an extra appointment** to complete the challenge **as soon as possible**, rather than waiting until Visit 11.

Study timelines

- Recruitment Feb 2012 to May 2014
- All ongoing cases are at 5 years+
- Funding is currently to Nov 2020

- We are seeking a no-cost extension, aiming for Nov 2021

- We will seek new funding beyond that, aiming for Nov 2024

- → Please plan to keep your site active, and your patients enrolled

- Parkinson's is a long-term condition, and we need prolonged follow-up
